

Supporting confidence in the management of Lower Limb Wounds!

We are pleased to invite you to our Coloplast Professional educational webinar

Date: Wednesday 17th July 2024

Time: 1:00pm – 2:00pm AEDT

With an aging population and rising incidence of diabetes, the huge burden of lower limb wounds on patient quality of life and health-care systems continues to grow.^{1,2} What can clinicians do to help reduce the burden of common lower leg wounds, such as venous leg ulcers, arterial ulcers and diabetic foot ulcers? How can you gain confidence in the identification and treatment of the common causes of lower leg wounds?

You are invited to join us for an interactive educational webinar with Donna Larsen (nee Angel), where she will discuss how to assess, plan, treat, monitor and refer common types of lower limb wounds. Donna will also bring attention to red flags indicating atypical wounds to ensure appropriate treatment and where necessary timely referral.

By consolidating and simplifying best practice recommendations and guidelines, Donna will share step by step processes to enable you to confidently manage lower limb wounds. Additionally, you will have the opportunity to access the Wound Type Specific Pathways for VLU to support your learning and translation to practice.

Donna Larsen
Nurse Practitioner

Learning Outcomes:

- Differentiate common types of lower limb wounds
- Be confident in conducting a comprehensive lower limb assessment
- Understand best practice for the management of venous and arterial leg ulcers
- Develop an understanding of atypical leg ulcers
- Recognise when to make a timely and appropriate referral

About Donna:

Donna is a Nurse Practitioner (NP) in Wound Management at Royal Perth Hospital (RPH), Western Australia. Donna has over 30 publications in Wound Management and Vascular Surgery. She is an Editorial Board Member for the journal, Wound Practice and Research. She is also Board member of the International Wound Infection Institute. She was awarded as a Life Member of Wounds Australia for her contribution to the organization. Donna is part of the High-Risk Foot Unit at RPH and has a strong interest in improving the health of indigenous people. Her other main interest is wound infection.
